

Step into  
**a new world**  
of network automation  
with Network Configuration Manager

TRY IT FREE

You're called upon to reduce the time required to manage critical changes and repetitive tasks across complex, multi-vendor networks. SolarWinds® Network Configuration Manager (NCM) can help you save time and prove compliance with automated network configuration management and backup.

With [Network Configuration Manager](#), you can:

- Push bulk configuration updates across hundreds or even thousands of devices in minutes
- Save users from spending hours resolving a network crisis by seamlessly backing up, managing, and restore configurations to quickly re-establish service
- Deploy standardized configs, detect out-of-process changes, audit configurations, and correct violations
- Use NCM's integration with the National Vulnerability Database and access to the most current CVEs to identify vulnerabilities in your Cisco devices
- And much more

| Last 4 Config Changes |       |                        |                    |
|-----------------------|-------|------------------------|--------------------|
| ID                    | User  | Date                   | Action             |
| 10001                 | admin | 11/03/2019 10:00:00 AM | View Change Report |
| 10002                 | admin | 11/03/2019 10:00:00 AM | View Change Report |
| 10003                 | admin | 11/03/2019 10:00:00 AM | View Change Report |
| 10004                 | admin | 11/03/2019 10:00:00 AM | View Change Report |

So, venture into your network to reduce downtime with network audits to help prove the network is compliant and safe.
