## Get your network performance back on track

with **Bandwidth Analyzer Pack**

**TRY IT FREE**

Need to know which users, applications, and protocols consume the most bandwidth? Is excessive bandwidth utilization or unexpected traffic forcing you to reallocate resources or create unnecessary expenditures? Time to get aboard with SolarWinds® Network Bandwidth Analyzer Pack (BAP).

With our award-winning network performance products, Network Performance Monitor (NPM) and NetFlow Traffic Analyzer (NTA), you'll gain insights into traffic patterns and detect, diagnose, and resolve network performance issues. Working together with NPM, NTA's alerts help you analyze the who, what, and where of bandwidth usage, allowing you to take action.

If you're at a junction with your current monitoring solution, discover in-depth network insights and traffic analysis to help keep performance full steam ahead.
